### What is Elluminate?

*Elluminate is a web-conferencing tool that allows us to conduct meetings or training sessions LIVE over the Internet.*

### Minimum system requirements

- Processor - Pentium II 266 MHz processor or faster
- Operating System - Windows 95/98/MNE/NT/200/NT
- Memory - 64 megabytes of RAM
- Storage Space - 20 megabytes of available disk space on your hard drive
- Audio - Soundcard with speakers and microphone or headset
- Connection - 28.8 kbps or higher
- Internet Browser - Internet Explorer 4.0+ or Netscape 4.7

## 'Real-Time' Multimedia Tool Enables Online Collaboration, Education, Meetings

Elluminate was built specifically for live, multimedia collaboration. We can educate, demonstrate, and collaborate in real-time over the Internet without the need for travel or teleconferencing. Elluminate has a long list of features that make your meetings and training more effective and enjoyable.

### How Elluminate helps you work smarter and save money . . .

- **Two-Way Audio (Voice-over-IP)\*** - Crystal-clear audio over the Internet without teleconferencing. Use your computer's built-in microphone and speakers or plug in an external headset and mic. No more long-distance charges! \*Requires sound card
- **Bandwidth Efficiency** - Collaborate in real time, regardless of Internet connection speeds, knowing that everyone sees and hears the same thing at the same time.
- **Application Sharing, Interactive Whiteboards** - Share PowerPoint presentations, drawing tools, or anything on your desktop with participants. You or your participants can edit or add content via moderator-grantable mouse controls.
- **Record** - Saves the audio and video of a meeting or training session as a file for viewing later. The recorded meeting file can be emailed or set as a link on your website.
- **Direct Text Messaging** - Instant public and private messages to one participant, the entire group, or a selected group of participants.
- **Quiz Manager** - Allows the moderator to conduct interactive quizzes and surveys, load and store tests, and collect results.
